

Syphilis is getting around the NT

Most people don't know they have it but some people might see:

- Sores on their private parts or mouth
- Rash on hands or feet
- Hair starts to **fall out** from their head or eyebrows

Use CONDOMS
Get TESTED

Syphilis can be treated

This sex sickness is very bad, it can make you sick for the rest of your life. If you have had sex without a condom, get a test at the clinic.

If pregnant women get it, the baby can get very sick and maybe die.
